Notes

HOST_* properties are representing the host I'm connected to and are available without a deviceTRUST client installed on the remote device

DEVICE_* properties are representing the remote device and are only available if a deviceTRUST client is installed on the remote device

Property Type

Session = This property is a session specific property and is valid for the lifetime of the user session

Dynamic = This property is a dynamic property and is checked for changes once per minute (can be defined)

Real Time = This property is a real time property and gets immediately updated when the value has been changed

[1] Not available on Microsoft Server 2008 R2 when using Remote Desktop Protocol (RDP)

[2] Not available when using Remote Desktop Protocol (RDP)

[3] Apple iOS version 11 or higher

[4] Apple macOS version 10.12 or higher and Citrix HDX only with Citrix Workspace App version 1903 or higher

[5] The deviceTRUST client is pre-installed in IGEL's own Linux-based operating system IGEL OS (version 10.03.500 or higher) and can be easily activated via the IGEL Universal Management Suite (UMS)

[6] The deviceTRUST client package can be downloaded from the Unicon Software portal https://myelux.com and be easily activated and deployed with the SCOUT Management Server and ELIAS
